CAREER OPPORTUNITY

Scientist III Biology Department

Water & Air Research, Inc. is looking for a highly motivated Scientist with expertise in aquatic ecosystems including submerged aquatic vegetation, benthic habitats, and project management. The successful candidate will play a key role in our team, working on projects related to the living terrestrial, aquatic, and marine environments.

RESPONSIBILITIES

- Develops and implements project plans and schedules; reviews project accounts; assigns, oversees, and evaluates project staff; and communicates with clients
- Creates budgets, designs scope of work, prepares proposals, gives presentations, and produces moderately complex designs, analyzes data and prepares reports.
- Performs fieldwork, which may include vegetation identification and monitoring, wetland delineation, and collection and identification of various plant and animal specimens. May include working from boats, in water, or along the banks of streams, rivers, lakes, and estuaries in order to collect water, sediment, fish, macroinvertebrates, and aquatic plant samples.
- Researches and maintains marketing contacts. Interacts directly with clients and prospective clients.

EDUCATION & EXPERIENCE

- Bachelor's degree in Biology or related science area.
- Minimum of 7 years of related experience. Master's degree in biology or related field may substitute for some experience
- Experience with project management.
- Proficiency in assessments, data collection, statistical analysis (using R, PRIMER, etc.), and report writing.
- Excellent communication and interpersonal skills, with the ability to effectively collaborate with clients and team members.
- Travel will be dependent on project demands.
- Valid drivers license with clean driving record required.
