CAREER OPPORTUNITY

Position: Associate Engineer / Geologist / Scientist
Department: Environmental Sciences

Water & Air Research, Inc. (Water & Air) is a multidisciplinary, employee-owned environmental engineering and consulting firm comprised of engineers, geologists, biologists, environmental scientists, planners, and support staff. Water & Air provides a wide range of services to private and public clients throughout Florida and other regions of the United States

Founded in Florida in 1970, Water & Air employs more than thirty-five staff members at our corporate office in Gainesville, Florida. Since the Company's inception, Water & Air has helped clients deal with vital environmental issues while promoting environmental responsibility.

SUMMARY

This is an entry-level, full-time, exempt professional position responsible for performing routine professional assignments requiring the application of standard techniques, procedures, and criteria in completing tasks. An environmental engineering background is preferred, but candidates with a 4-year degree in geology, environmental science, or other related degree will be considered.

ESSENTIAL DUTIES & RESPONSIBILITIES

Duties are assigned to provide experience and familiarization with the Florida Department of Environmental Protection (FDEP) Standard Operating Procedures (SOP's) for soil and groundwater sampling, remediation system design, and testing professional methods and practices of the Company.

- Performs routine computations, designs, and plans; participates in studies, and performs simple analysis on data.
- Researches and maintains marketing contacts and generates company backlog.
- Drafts documents, or portions of documents, for projects and proposals. Provides detailed instructions for the construction of CAD drawings; reviews and approves drawings.
- Researches and prepares reports for clients.
- Calibrates, operates, and maintains equipment used to perform duties.
- Assists Project Manager with data entry, graphics, and/or other reporting responsibilities.
- Assists field operations as directed, including manual tasks of equipment setup and maintenance.
- Makes recommendations on work assignments and on variables that affect field operations.
- Coordinates fieldwork for technicians. Prepares for field events and loads equipment into assigned trucks; completes field notes and all required FDEP SOP forms in the field.
- Schedules and coordinates fieldwork and perform soil and groundwater sampling in accordance with the FDEP SOP to ensure the collection of representative samples. May include working from boats, in water, or along the banks of streams, rivers, and lakes in order to collect groundwater and soil samples.
- Supervises drilling activities including, but not limited to, monitoring wells, soil boring, DPT, and remediation wells.
- Inspects field notes, equipment calibration forms, and FDEP forms to ensure completion prior to departure from site.
- Fields work for remedial installations, trenching, piping, coring, equipment staging, sets up operations, maintenance, etc.
- Interacts directly with clients and prospective clients.

CAREER OPPORTUNITY

- Creates, organizes, analyzes, and manages databases.
- Exercises dependability and demonstrates reliable attendance.
- Interacts professionally as a team player in an office environment.
- Possesses flexibility and versatility in order to contribute to evolving work situations.
- Manages confidential proprietary information.
- Other duties may be assigned to meet the needs of the business.

EDUCATION & EXPERIENCE

Required: Bachelor of Science in Environmental Engineering or related engineering field, Geology, or Environmental Science. Personal cell phone with active contract and valid driver's license are also required.

Strongly Preferred: Engineer-in-Training (EIT) certification. Experience with the FDEP Petroleum Restoration Program. OSHA/MSHA training. Familiarity with PID/FID and other field equipment.

Water & Air is an EOE/AAP/DFWP/Smoke Free/E-Verify Employer
